RASHED ABDULLAH

San Jose, California | RashedAbdullah518@gmail.com | (408) 898-7016 | linkedin.com/in/ahmad-rashed-abdullah

SUMMARY

Dedicated Civil Engineer with 1 year of experience in construction oversight, quality control, structural inspections, procurement coordination, and contract auditing. Proficient in AutoCAD, Revit, SAP2000, and construction documentation, with experience interpreting plans, resolving field discrepancies, and supporting compliant, timely project delivery.

EDUCATION

Master of Science in Civil Engineering *Expected May 2027*

San José State University, San José, CA

Relevant Coursework: Construction Management; Structural Analysis and Design; Materials Science and Engineering; Earthquake Engineering

Bachelor of Science in Civil Engineering *October 2015 - August 2020*

Turkish National Defense Academy, Ankara, Turkey

PROFESSIONAL EXPERIENCE

Engineer & Principal Assistant to Chief Executive Officer, National Military Hospital, Kabul, Afghanistan *August 2020 - August 2021*

- Audited vendor contracts and reconciled purchase orders, delivery schedules, and receiving records against project specifications, resolving discrepancies with vendors and site teams to maintain timely material delivery.
- Conducted quality-control and site inspections of construction materials, equipment, and structural components against design plans and specifications, identifying deficiencies and driving corrective action to protect project quality and schedule.
- Interpreted complex construction drawings and specifications, coordinating with field teams, architects, and stakeholders to resolve discrepancies and ensure accurate execution of approved plans.
- Coordinated executive meetings, events, and conferences for the CEO, aligning staff, schedules, and external stakeholders to support seamless organizational operations.

PROJECTS

Structural Dynamics Analysis | Academic Project *In Progress*

San José State University

- Conducted dynamic analysis of a mixed concrete-steel structural system, calculating stiffness, mass, natural frequency, and damping to quantify the structure's vibration response.
- Computed mode shapes, eigenvalues, and damping ratios using equations of motion for a multi-degree-of-freedom system to characterize the structure's dynamic behavior.
- Translated structural analysis results into actionable engineering conclusions, isolating the governing factors controlling stability, serviceability, dynamic response, and compliance with design criteria.

ADDITIONAL EXPERIENCE

Security Officer, Inter-Con Security, Mountain View, CA *July 2023 - Present*

- Monitored CCTV surveillance systems across the Google campus, identifying suspicious activity, security violations, and potential safety risks to support rapid response and protect personnel, facilities, and assets.
- Enforced access-control protocols by rigorously verifying personnel credentials and identity badges, preventing unauthorized entry to restricted and secure areas.
- Managed end-to-end issuance, tracking, and reconciliation of temporary access badges, enforcing authorization protocols and ensuring restricted areas remained accessible only to approved personnel.
- Conducted regular roving patrols both on foot and in a vehicle around perimeter fences, gates, buildings, warehouses, and storage areas as part of overall security measures.

SKILLS

- AutoCAD
- Revit
- SAP2000
- Construction Management
- SketchUp
- Documentation Management
- Project Scope
- Project Tracking
- Structural Analysis
- Leadership & Project Management
- Cost Estimation & Budgeting
- ArcGIS Pro
- Google Workspace
- Project Plans
- Program Management

LANGUAGES

- English: Full professional proficiency | Persian (Farsi): Native Speaker | Turkish: Full professional proficiency
